Restoring essential health services in Haiti post-earthquake

PAHO Director, Dr Carissa F. Etienne, reported that "staff is being deployed to the Grand'Anse and Nippes departments to support reestablishing health services at departmental levels," she said, referring to areas near the epicenter of the earthquake. COVID-19 and concurrent health emergencies have presented a challenge of caring for those with COVID-19 while adapting to ensure safe delivery of essential health services; pillar 9 of the [COVID-19 2021 SPRP](#) focuses on mitigating such service disruptions.

Health facilities in three departments in post-earthquake Haiti are overwhelmed and "In total 24 health facilities suffered damage, mainly first level of care." In addition to supporting Haiti's Ministry of Health and Population, PAHO has delivered essential medicines and other medical and surgical supplies for distribution to health institutions in need.

Dr Etienne called on the global community to meet the "urgent health needs" identified by the health ministry: "health personnel, supplies and equipment to treat patients with trauma, injuries, acute illnesses, chronic diseases and mental issues". She continued, "There is an urgent need to restore health services mainly in the most affected areas and to ensure adequate water and sanitation to prevent increases of diarrheal, respiratory, and skin diseases."

Key Figures

- WHO-led UN Crisis-Management Team coordinating 23 UN entities across nine areas of work
- More than 5.6 million people registered on [OpenWHO](#) and accessing online training courses across 37 topics in 56 languages
- 19 893 672 PCR tests shipped globally
- 203 896 426 medical masks shipped globally
- 83 086 700 gloves shipped globally
- 9 150 431 face shields shipped globally
- 188 GOARN deployments conducted to support COVID-19 pandemic response
- 4 615 260 567 COVID-19 vaccine doses administered globally as of 23 August
- *COVAX has shipped over 209 million vaccines to 138 participants as of 19 August
